Maryland Public Secondary Schools Athletic Association (MPSSAA)
VERIFICATION OF MINIMUM CERTIFIED WRESTLING WEIGHT

School Name: _______________ Student Name: ___________________________________ School Year: ______

Note to Licensed Health Care Providers and Parents
The National Federation of State High School Associations (NFHS) requires that each state high school association develop and utilize a weight-control program which discourages excessive weight reduction and wide variations in weight. An important component in this requirement is the establishment of a safe minimum weight class for the wrestler. NFHS regulations require that a wrestler’s minimum weight correspond to at least a 7% level of body fat (12% for females). Stated otherwise, the lowest weight class that a wrestler is allowed to compete shall be one where the wrestler retains a minimum of 7% body fat (12% for females).

Wrestlers must have their minimum weight class certified on or after November 1 and prior to their first competition. After their first competition, wrestlers may not certify to a lower weight classification. The MPSSAA Weight Certification Plan involves three steps:

• Hydration Testing, with a specific gravity not greater than 1.025. Hydration testing occurs immediately prior to a body fat assessment. A specific gravity of 1.025 or lower will assure that the wrestler is properly hydrated at the time of the body-fat assessment.
• Body-fat Assessment, using various factors including height and current weight, to predict what the wrestler would weigh in a hydrated state at a 7% level of body fat (12% for females). Wrestlers must be sufficiently hydrated before their body-fat assessment.
• Licensed Health Care Provider (LHCP) Signature, certifying a minimum weight class in which a wrestler may compete. The LHCP must utilize the results of the body-fat assessment to certify a minimum weight classification for the wrestler. If a wrestler’s projected minimum weight at a 7% level of body-fat (12% for females) is within 2% of a lower weight classification, the medical doctor, at his or her discretion, may certify the wrestler at the lower weight class; otherwise, the minimum weight class should be the next higher weight class.

Note to LHCP
Using the results of the hydration test and body fat analysis conducted for this wrestler, please circle one of the weight classes below. That weight class will be the minimum weight class in which the wrestler may participate for the season.

Current Weight Classes Used for Coed High School Competition: (new 2023)
106  113  120  126  132  138  144  150  157  165  175  190  215  285

Current Weight Classes Used for Girls Competition:
100  105  110  115  120  125  130  135  140  145  155  170  190  235

The weight class circled above is the minimum weight class in which _____________________________ may participate for the 2023-2024 wrestling season. _____________________________
Name of Wrestler

LHCP Signature: ___________________________ LHCP Stamp/Seal:

Date: ________________

A Licensed Health Care Provider (LHCP) is defined as a licensed physician, certified physician assistant under the supervision of a licensed physician, or certified nurse practitioner.
